### Projects

**1) Developer Portfolio** (Fullstack Development // Design)

Link: <https://marcustech.dev>

**Description:** My Software development website created in Nextjs, deployed with a custom domain via porkbun.

**2) Calculator.js** (HTML, CSS, Javascript)

Link: <https://javsacript-calculator.vercel.app/>

**Description:** A simple calculator that I created to understand Javascript & HTML interactivity. HTML provides the structure, CSS is used for design techniques, & Javascript handles the input and display actions.

**3) "Stepper"** (Java, Spring Boot, HTML, CSS, JS)

Link: n/a

**Description:** A cross platform, mobile-first, rhythm game geared towards discovering new music and artists.

**4) Web Order Entry Application** ( Nodejs, MongoDB)

Link: <https://informationtracker.vercel.app/>

**Description:** During my time spent employed at Doorking, I created a tool that served as a backup for the IBM AS400 software tool. Its' use-case serves as an alternative tool that takes in a value and returns a value based on previous data entered on user input.

**5) KONG1 Software Synth VST** (HTML, CSS, JS, C)

Link: <https://kong-1.vercel.app/>

**Description:** An audio application designed to create sounds & record/edit existing audio files via touch controls.
